Microsoft stopped Windows 7 Service Pack 1 updates; security updates and updates for the Windows 7 operating system are being released in a Microsoft Lifecycle Policy. As the system software for Windows 7 and Windows Server 2008 and other Windows Vista and Windows Server 2008 Operating System software released on August 4, 2010. Microsoft stated that it would stop releasing security updates for Windows 7 and Windows Server 2008 until July 14, 2015, after which the final Microsoft Lifecycle Policy update for Windows 7 and Windows Server 2008 is scheduled to be released. Windows Server 2008 Microsoft announced a Windows Server 2008 Security Update release on May 10, 2012. With this release, Microsoft will support Security Update for Windows Server 2008 until January 16, 2016. Security Update for Windows Server 2008 will be a part of the Microsoft Lifecycle Policy. Windows Server 2012 On June 30, 2012, Microsoft released Security Update for Windows Server 2012 (KB3179611) and on January 14, 2016, Microsoft released Security Update for Windows Server 2012 (KB3147770) with Last of support on January 16, 2016. Windows 8 On April 18, 2012, Microsoft released a Windows 8 security update (KB3172953). This update can be downloaded from Microsoft website. Windows 8.1 On March 26, 2015, Microsoft released a Security Update for Windows 8.1. (KB3180534) to the public. Windows 10 Windows 10 will be released on July 29, 2015. (The release date was leaked to the public on May 4, 2015). Reception Windows 7 Troy Hunt has explained that the Windows 7 March 2011 update, released on March 15, 2011, was only partially tested before being made available to all Windows 7 users. On March 17, 2011, the same day it was made available, Microsoft attempted to push the update out to all Windows 7 users via automated update downloads from Microsoft Update. Many computers were taken offline by their respective networks, and certain users were unable to download the updates. Among the issues reported with the update was a blue screen of death, where blue lines keep appearing on a computer while trying to upgrade from Windows 7 Ultimate, and Windows 7 Home Premium to Windows 7 Ultimate. This was caused by an error in the activation database, and some users were unable to reset their account. Windows 8 was released on October 26, 2012 and features a faster boot time, using a smaller set of Windows components. It also 82157476af
